

HP Compaq t5530 Thin Client

Enhanced features for mainstream business use.

The HP Compaq t5530 Thin Client delivers a great desktop experience for general office applications or your specific line of business software. This unit's enhanced features make it ideal for mainstream business use, with support for legacy ports, ICA, RDP, terminal emulation, Windows Media Player, and basic web browsing. The HP t5530 can provide convenient access to server-based computing solutions, HP's Consolidated Client Infrastructure (CCI), or a variety of remote desktop solutions.

HP thin clients lead the way with proven business technology for maximum security and lower ownership costs, and are easy to buy, deploy, and manage with a great price-performance ratio.

Improved manageability

- Manage thin clients, PCs, and servers end-to-end without a vendor's proprietary management tool through industry-standard Altiris Deployment Solution. Full license included with every HP thin client.
- The HP-exclusive built-in HP ThinState Tools allow administrator to make changes to image or settings on one "master" client, capture the new image and settings on a USB flash drive or on the thin client itself, and then easily deploy it to "target" thin clients.

- Support for HP OpenView Client Configuration Manager for quick and easy deployment of images and thin client management.
- Upgrade images with FTP and DHCP image update feature.

Better security

- Store critical user data and applications on the secure, centralized server.
- Smart card support for two-factor authentication for secure access to your network.
- Two USB ports inside a secure compartment help prevent theft with USB options hidden inside the client and out of your way. Great for safeguarding USB wireless devices.
- Selectively disable USB ports for enhanced security.
- Locked down administrator and user passwords.

Reliability

- Enjoy years of reliable use with solid-state design and industry-standard architecture

Global sales and support

- The HP Compaq t5530 Thin Client is backed by HP Global service and support through our network of 50,000 IT pros in over 100 countries.
